

ENSURING EQUITABLE PATIENT ACCESS TO ESSENTIAL HEALTH SERVICES

What Pharmacists Are Saying About Patient Care & the Need for H.R.7213

Support H.R.7213 to enable patients to continue to receive timely and consistent care and services from America's pharmacists.

TERRI DOSS | Owner & Managing Pharmacist, Man Pharmacy & Hometown Rx (Logan, WV)

"In 2021, West Virginia had the most vaccinations per capita in the nation, to a large extent because of the accessibility of community pharmacies. Nationally, pharmacists have administered 252 million COVID-19 vaccine doses."

STEPHEN FADOWOLE | Pharmacy Manager, Walgreens (Chicago, IL)

"While the pandemic overburdened many emergency care providers in Chicago, pharmacies remained open and expanded their health services. Patients relied on pharmacists to access COVID-19 tests, vaccinations and treatment, and to manage related health conditions that put them at greater risk for COVID-19 complications."

MICHELLE FARRELL | Owner & Pharmacist, Boscobel Pharmacy (Boscobel, WI)

"We know that patients visit their community pharmacist approximately twice as frequently as they visit primary care physicians and interact more with their pharmacist than with any other health care provider across the United States."

SCOT SCHMIDT | Owner & Pharmacist, North Star Pharmacy & Infusion (Cheyenne, WY)

"By addressing restrictions to pharmacist care, Congress has an opportunity to solve deep-rooted inequities that persist in rural America and ensure patients are protected from the public health threats of today and tomorrow."

FUTURE OF PHARMACY CARE COALITION

The *Future of Pharmacy Care* Coalition and more than 160 associations representing patients, pharmacists, pharmacies, and rural and underserved communities support H.R. 7213.
